

Aquacoustic Hybrid  
**SPC FIESTA+**  
 AQUACOUSTIC HYBRID RANGE

**Introducing our Fiesta+ range: everything you love about our original Fiesta collection, with added benefits!**

The unique engineered tri-layer limestone polymer core provides greater dimensional stability compared to mono-layer alternatives or natural timber and the hardness of the core significantly improves the indent resistance of the surface.

It's waterproof qualities, high fire rating, slip resistance, scratch resistance, and pet friendliness makes it a superior choice. All SPC ranges are commercial grade and can be installed using floating methods. The SPC Fiesta+ features a 7mm thickness and is enhanced with a natural satin finish, making it perfect for any home. Instead of the cork used in the original Fiesta series, Fiesta+ is upgraded to a high-density IXPE layer, twice the industry standard density, ensuring superior stability and acoustics for a quieter and more durable floor.

**WHAT'S THE DIFFERENCE BETWEEN OUR ORIGINAL FIESTA AND FIESTA+ RANGE?**

A TOTAL OF 1MM ADDED FOR ADDITIONAL STABILITY  
 BRAND NEW RUBBER BACKING MADE WITH HIGH DENSITY IXPE
